BECK LAST YEAR

The office has been filled stace Mr. Beck's election to the Administrative Board by John E. Butler, who was appointed by the board. Mr. Butler took office in the face of considerable criticism, but has discharged the dutles of his office efficiently, and is regarded as a valuable city servant by the board which appointed him. He has repeatedly appeared before Council committees to oppose attempts to override the Building Code, notably in the case of J. Stagg Powell recently. Since its creation the personnel of the office has undergone continuous change. The only one still attached to the department who took up his work with it when it was created seven years ago is George I. Byrne, secretary to the Building Inspector and statistician of the department. He completed yesterday his eighty-fourth itemized monthly statement of the department's operations.

With Mr. Butler there are at present associated in the Building Inspectors E. B. Wharton, George E. Schraudt, H. F. Smith and James Phillips. Mrs. J. L. Stearnes, of Salem, and Major Robley S. Stearnes, of New Or-leant, are the guests of Mr. and Mrs. R. C. Stearnes, in Westhampton, Major Stearnes is a brother of the State Su-perintendent of Public Instruction. What Pasteurization of Milk Is

Pasteurization is a heating process discovered by the French chemist, Louis Pasteur, and is extensively used by leading dairies throughout the world to insure freedom from all bacteria in milk.

When milk is heated to a temperature of 115 degrees for a period of thirty minutes, and then rapidly cooled to a temperature of 50 degrees, it is rendered perfectly safe, and you can use it with impunity. The process of pasteurization effects no chemical or physical change in the constituents of milk, but simply insures its freedom from taint in

At a cost of many thousands of dollars the Richmond Dairy Company has installed a modern Pasteurizer and you are invited to call and inspect its

The Richmond Dairy Company receives its supply of milk from dairy farms which are under the direct supervision of the Richmond Health Department, which has done so much to promote a good milk supply, and has ably assisted both farmers and dairies toward the accomplishment of this

"Pasteurizing has two advantages. It removes from the milk all danger of the distribution of contagious diseases, and it accomplishes this in such a way that the Pasteurized milk, after cooling, can hardly be distinguished from fresh milk."—H. e Your Grips

If you've got a drop of red blood in your veins---if your heart beats one bit faster to the tune of romance---adventure---love and mystery---then you will read with avidity and delight the story "THE TREY O'HEARTS," by LOUIS JOSEPH VANCE, which will shortly appear in The Times-Dispatch.

You know how "The Fortune Hunter," "The Black Bag," "The Brass Bowl," all by Mr. Vance, have stirred the world; how they have gripped, thrilled and inspired. "The Trey O'Hearts" overshadows them all. The author has set a mark in this story which it is doubtful if he will ever reach again. Action, plot and telling combine to make "The Trey O'Hearts" a record breaker among the best sellers.

You cannot fathom the plot of this story, no matter how clever you are---it keeps you doing mental gymnastics. Surprise is too mild a word to describe the situations which punctuate "The Trey O'Hearts," and every instalment ends with a startling climax which leaves you tense, waiting for the next one.
